

OUT-PATIENT ULTRASOUND AND TELERADIOLOGY AVAILABLE NOW

BOARD-CERTIFIED RADIOLOGIST AVAILABLE FOR OUT-PATIENT ULTRASOUND AND TELERADIOLOGY

Our new radiologist, Dr. PJ Hamel, is now available full-time for out-patient ultrasound and teleradiology. Dr. Hamel is also happy to consult with you about the best imaging modality for your patient and any other radiology questions you may have. Read Dr. Hamel's full bio at bbvsh.com/hamel.

COMPLETE DIAGNOSTIC IMAGING SUITE AND ADVICE TO OPTIMIZE DIAGNOSTIC YIELD

Toshiba Aplio 300 ultrasound, 64-slice CT scanner with automated contrast injector, high-field (1.5T) MRI, and Siemens flat-panel C-arm fluoroscopy unit all on-site. Our radiologist can advise you as to which modality is best suited to achieve an accurate diagnosis for your patients.

U/S GUIDED FNA's AND BIOPSIES WITH POST-SAMPLING MONITORING

ICU/Critical care monitoring supported by board-certified criticalists and radiologist following sampling and/or sedation to identify and address any possible complications.

RAPID TURNAROUND OF CYTOLOGY RESULTS

TNVD pathology lab is located next door for rapid turn-around of cytology results. If needed for critical cases, STAT cytology reads can obtain a diagnosis within 1-2 hours.

LET US TAKE CARE OF THE LOGISTICS

We will set up the scheduling, handle the sedation and recovery, handle the samples, take care of the patient after image-guided sampling or if they are sick, and deliver the results back to you.

BOARD-CERTIFIED SPECIALISTS ON STAFF

Criticalists and surgeons on-site 7 days/week for critical patients and those needing surgery. An Internist and Oncologists available for consults based on U/S findings (often same-day).

TELERADIOLOGY AVAILABLE

Please contact our diagnostic imaging liaison at 604-514-8383 or info@bbvsh.com to set-up teleradiology services.

DID YOU KNOW?

- Our radiologist can perform intra-operative ultrasounds to assist our surgeons and works with our internist to perform interventional radiology (IR) and interventional endoscopy (IE).
- BBVSH has the MEDRAD Stellant CT Injection System; an automated contrast injector enabling precisely timed contrast delivery during scanning – minimizing artifacts and maximizing diagnostic yield.

HOW TO REQUEST A REFERRAL

- Please fill out the referral request form (available as PDF or online form) at bbvsh.com.
